

## Osterhout Design Group Partners with Paramount Pictures to Showcase the Future of In-Flight Entertainment

---

**San Francisco, California, September 21, 2015** - Osterhout Design Group (ODG), the leading Smart Glasses designer and manufacturer, today announced it will be attending the [Airline Passenger Experience Association \(APEX\) and International Flight Services Association \(IFSA\) EXPO](#) in Portland, Oregon to showcase the future of in-flight computing and entertainment with its new [R-7 Smart Glasses](#) and content provided by [Paramount Pictures](#).

“As a fully-connected mobile computing platform, the R-7 allows airlines’ passengers to privately browse the web, check emails, and run Android applications, while also delivering cutting edge entertainment and virtual experiences that cannot be achieved with tablets or traditional in-flight screens,” said Pete Jameson, COO of ODG. “Our technology is ideal for first class passengers, private-flight environments, or airlines simply looking to provide a best-in-class experience for their customers, and we look forward to demonstrating it at the APEX/IFSA EXPO.”

ODG’s R-7 are the world’s most advanced Smart Glasses featuring stunning ultra-transparent 3D stereoscopic displays and packed with innovative technologies in a small, light and sleek design. R-7 requires no external computing or other support and delivers an unparalleled user experience of display clarity, on-board processing power and system accuracy. The Glasses offer gaming, Augmented Reality, and simulate a floating 65-inch HDTV.

“ODG’s Smart Glasses deliver crystal clear audio visual quality perfect for showing Paramount content,” said Joan Filippini, Paramount’s SVP, Non-Theatrical Distribution. “While wearing ODG’s glasses, airline passengers can now watch both 2D and 3D movies and receive an unforgettable experience. This will be a compelling element in the future of in-flight entertainment.”

ODG will be located at booth #335. For more information about ODG and its products, visit: [www.osterhoutgroup.com](http://www.osterhoutgroup.com)

### **About ODG**

San Francisco-based Osterhout Design Group (ODG) was founded in 1999 as a technology incubator and today is focused on revolutionizing wearable technologies and developing innovative and sophisticated situational awareness, security and first-responder solutions for government, enterprise and ultimately, consumer markets. The company is privately held with over 80 employees.
